SEWA INTERNATIONAL

COVID19

Relief & Rehabilitation

Why

The traumatic second wave devastated all sections of our society. The rise in COVID deaths despite complete and partial lockdown in most states was concerning.

It showed that there was a need for more resilient, agile, innovative and collaborative systems which can hold the rural healthcare infrastructure.

Sewa Europe, committed to its mission of serving humanity in distress, has been working in an all-inclusive, integrated manner with various stakeholders within and outside India to counter the immediate impact of the pandemic as well as developing a strategy for long-term intervention.
